

About setup

```
\documentclass[a4paper,extrafontsizes,12pt,article]{memoir}
\chapterstyle{ell}
\pagestyle{empty}
```

Miscellaneous

2.1 stackrel - One above another

You can put one element above another by using stackrel as mentioned here: <http://www.uz.ac.zw/science/mathslatex/stackrel.html>

Do this:

```
H$_2$CO$_3$ $\stackrel{heat}{\longrightarrow}$ H$_2$O + CO$_2$
```

It looks like this: $\text{H}_2\text{CO}_3 \xrightarrow{\text{heat}} \text{H}_2\text{O} + \text{CO}_2$
